Profile

U.S. Air Force avionics professional with 7 years of experience maintaining and repairing C-130J aircraft systems and leading maintenance teams. Manages 13 maintenance personnel and \$17M in equipment inventory, and designed a quality-performance tracking system that drove a 12% improvement in pass rates.

Skills & Abilities

- Avionics troubleshooting & repair
- Wire maintenance & wiring diagram interpretation
- C-130J aircraft systems
- Inventory & asset management
- Team leadership & training
- Quality & performance tracking
- Safety & quality management
- Process improvement
- Blueprint reading
- Microsoft 365

Experience

CONSOLIDATED TOOL KIT (CTK) MANAGER UNITED STATES AIR FORCE, LITTLE ROCK AFB

JANUARY 2026 – PRESENT

- Manage 13 maintenance personnel, overseeing scheduling, professional development, and daily workflows.
- Direct inventory control for \$17M in equipment, streamlining tracking processes to maximize operational efficiency.
- Designed and implemented a quality-performance tracking system that identified individual performance gaps and emerging trends, driving a 12% improvement in pass rates within six months.
- Trained 12 employees on equipment management software, standardizing procedures for inspection accuracy.

HONOR GUARDSMAN UNITED STATES AIR FORCE, LITTLE ROCK AFB

JUNE 2025 – DECEMBER 2025

- Led teams of 3–6 personnel through 40+ formal ceremonies, coordinating responsibilities and ensuring consistent execution in highly visible settings.
- Represented the Air Force at 70+ military funeral ceremonies across Arkansas and Tennessee.
- Managed accountability and readiness of 36 ceremonial rifles and equipment; earned the Air Force Achievement Medal for Honor Guard service.

AVIONICS JOURNEYMAN UNITED STATES AIR FORCE, LITTLE ROCK AFB

SEPTEMBER 2019 – MAY 2025

- Performed advanced troubleshooting and repair of C-130J avionics systems, including instruments, flight controls, communications, navigation, autopilot, and wiring.
- Conducted advanced wire maintenance and repair of complex avionics wiring harnesses using detailed wiring diagrams and technical manuals.
- Led complex troubleshooting efforts with specialized diagnostic equipment and technical documentation, resolving system failures while maintaining strict safety and quality standards.
- Trained and mentored four airmen in troubleshooting, diagnostics, equipment repair, and electrical systems.
